I

## Population Genetics of Arabs, a Primer

Abdul Rezzak Hamzeh

08

Historical Perspective

Genetic and Phenotypic Variation between Population Groups

Types of Genetic Variation

The Human Genome Project (HGP) and the Human Variome Project (HVP)

The Molecular Basis and Driving Force behind Variation

III

## An Overview of Medical Genetic Services in Saudi Arabia

Jumana Al-Aama, Amal Alhashem

14

Introduction

Healthcare System across the Kingdom

Preventive Services

Medical Genetics Research across the Kingdom

Genomics and Data Sharing in the Kingdom

Epilogue

III

## An Overview of Mendelian Disorders in Saudi Arabia

Ahmed Alfares, Fowzan Alkuraya

24

Introduction

Genetics in Saudi Arabia

Consanguinity, Tribal Unions and Founder effects

Zygoty and Mode of Inheritance

Novel Gene Discoveries

Prenatal Genetics and Prevention Genetics

Ethical Considerations

## IV

### Islamic Bioethics in the Context of Medical Genetics

Aida I Al Aqeel

36

Introduction

Bioethics in Islam

Genetic Counseling: the Challenges

Consanguinity in the Kingdom of Saudi Arabia

Population Genetic Screening Programs and Islamic Ethics

Conclusions

## V

### Genetic Disorders in Saudi Arabia: A CTGA Perspective

Sami Bizzari, Alya Qari, Ameera Balobaid, Sayeeda Hana, Asha Deepthi, Pratibha Nair, Stephany El-Hayek, Abdul Rezzak Hamzeh

42

Introduction

Number of KSA Disease and Gene Records in CTGA

Distribution of the modes of inheritance of KSA-CTGA disease records

Distribution of disease groups and affected systems of KSA-CTGA disease records

Concluding remarks

50

Appendix 1
